

## SMALL GROUP SORTING EXERCISE WORKSHEET – Industrial: Groups 3 and 4

ID	Policy Option	Recommended Bin	Suggested Contact/Source for Additional Information
RCI-71	Energy Tracking and Benchmarking Fundamental Building Block	A	Absolutely needed Evaluate the possibility of adopting CA program here
RCI-72	Incentives for Renewable Energy Applications (Solar roofs, etc.)	B	Benefit depends upon amount of incentive and structure-also level of future carbon tax
RCI-73	Industry-Specific Emissions Cap and Trade Programs	D	Address as a cross-cut issue likely a strong tool, many issues involved
RCI-74	Negotiated Agreements	D	Result of regulatory actions? Enforcement tool - Negotiated incentives?
RCI-75	Green Power Purchases	A	Need to advertise/get information on the many available programs
RCI-76	Clean Combined Heat and Power	B	Need to determine how the state would be involved - incentives? Best used on new projects, not retrofits
RCI-77	Industrial ecology/ by-product synergy	D	More on economic development project - should be passed on to that type of agency
RCI-78	Cement Industry: Clinker reduction/substitution, use of alternative fuels (Encourage use of substitutes instead of limestone)	B	Serious technical hurdles
RCI-79	Net-metering policies	A	Being done - too new
RCI-80	Time of Use Rates, Load Management and Curtailment Programs	B/C/D	Doesn't necessarily lower total energy use C - Doesn't reduce CO2 - need more information of potential CO2 reductions
RCI-81	Participation in Voluntary Industry-Government Partnerships (other GHG's rather than CO2)	B	These chemicals may have large eCO2 payback, but may have technical issues combine with RCI-84
RCI-84	Use of Alternative Gases (other HFCs, hydrocarbon coolants, etc.)	B	Similar to RCI-81 (combine?) Substitutions of gasses....
RCI-85	Water pumping and treatment efficiency	D	Should be considered in a general process group
